Subject: tag recommendations

Dear Commissioners,

I would like to address the issue of tags being removed from archery and given to all legal methods. Here is one example and one that personally affects me. I have been putting in for many years for buck antelope unit 251...

year	method	draw odd	tags	success rate	harvest
07	rifle	11-1	12	83%	10
07	archery	3-1	5	80%	4
08	rifle	11-1	11	91%	10
08	archery	5-1	3	100%	3
09	rifle	12-1	13	85%	11
09	archery	6-1	3	67%	2

2010 recommendations rifle 14
archery 2

If the same # of applicants of 09 put in, the 2010 odds will be as follows

	draw odds	tags
2010 rifle	10-1	14
2010 archery	9-1	2

I feel this is unfair to the archery hunters !!! I have spoke to the biologist about this and he said " If the archery success is to low they might give it to rifle hunters , or it to high might take a tag away" That is a catch 22.

07-09	average success	average harvest
archery	82%	3
rifle	86%	10.3

I feel that 12 tags to rifle and 4 tags to archery would be more appropriate.

Thank you,
Nicole
