Nevada Department of Wildlife

Great Basin Bird Observatory

Don't miss out on this rare opportunity to catch a glimpse of our local wildlife's night time activities! This exciting family event will start at Rock Park in Sparks where we'll have some bat activities then bike, trike, scooter, or skate to the bat bridge. After the bats take off into the sunset we'll head back and meet at Oxbow Nature Study Area to look for owls, deer, and other wildlife. Please wear comfortable walking shoes and bring water and bug spray. Space is limited and pre-registration is required.

Highlights

- Great Basin Bird Observatory Biologist Amy Leist will talk about local bird populations and join us on our search for bats and owls.
- A colony of about 80,000 Mexican free-tail bats summer under the McCarran bridge as well as Little brown and Big brown bats.

Pre-registration is required
