

**ROCKY MOUNTAIN ELK
HUNTER INFORMATION SHEET
Units 111 - 115, 221, 222**

LOCATION: Eastern White Pine County, northern Lincoln County and extreme eastern Nye County - Schell Creek, Snake, Antelope, Kern and south Egan Mountain Ranges. See unit description in the **Nevada Hunt Book**

ELEVATION: From 5,100' in Snake Valley to 12,050' on Mount Moriah.

TERRAIN: Gentle to extremely difficult.

VEGETATION: Ranges from salt-desert shrub on some valley floors through sage and mtn. brush, pinyon/juniper, mtn. mahogany and aspen types at mid elevations to aspen/fir/spruce/limber pine/bristlecone pine at higher elevations. Mountainous areas consist of roughly equal parts brush and forest types.

LAND STATUS: Predominantly public (BLM & USFS). Hunting is not permitted on National Park Service lands (Great Basin National Park) located in Unit 115. Most private land is located on valley bottoms and benches. Private lands do not restrict access to hunting areas except for parts of McDonald Canyon and Muncy Creek in Unit 111. The relatively large Goshute Indian Reservation is located in Unit 113 and access is by permission only.

HUNTER ACCESS: Excellent in most areas but limited by terrain on the east side of Unit 111. Vehicles are prohibited in the Mount Moriah Wilderness Area (Unit 114). **Note:** Please be aware that sections of Unit 111, Unit 114, Unit 115, Unit 221, and Unit 221 are in wilderness areas. Motorized equipment, mechanized transport, including wheeled game carriers and chainsaws, are prohibited in wilderness areas. Contact the Federal Management Agency responsible for this area for more information.

MAP REFERENCES: USGS (1:100,000 scale) topographic and land status maps - **Garrison, Ely, Kern Mountains, Currie**. USGS 1:250,000 scale maps - **Ely, Lund**. Maps are available from BLM and USFS offices in Ely, as well as private map vendors.

FACILITIES AND SERVICES: Most services are available in Ely with some services found on Hwy. 93 at Schellbourne and Lages Station and on Hwy. 50 in Baker. Public campgrounds exist at Cave Lake State Park, at Timber Creek and East Creek on Forest Service lands in Duck Creek Basin of Unit 111, at Baker Creek and Lehman Creek on National Park lands in Unit 115 (check National Park regulations concerning proper storage and possession of firearms and possession of harvested animals since hunting is not allowed in the National Park), and at Cleve Creek in Unit 111 on BLM land. Primitive camping is allowed throughout the unit group on public lands except, it is unlawful for any person to camp within 100 yards of a waterhole in such a manner that wildlife or domestic stock will be denied access to such waterhole (NRS 503.660).

RECOMMENDED HUNTING AREAS: Units 111 and Unit 222 have the largest elk herds and are probably the best bets for larger bull elk. Units 113 and 221 have the next largest elk populations and Units 112, 114, and 115 have the fewest number of elk.

SPECIAL COMMENTS: Expect some hunter congestion from deer hunters in Unit 111, especially in Duck Creek Basin.
