

PULL YOUR

PLUG

**CLEAN, DRAIN & DRY
YOUR WATERCRAFT**

IT'S THE LAW

Nevada Revised Statute 488.045 requires the owner, operator or person in control of any vessel must ensure that the drain plugs, drain valves and any other devices used to control the draining of water remain open while transporting the vessel on public roads in the State of Nevada.

DO YOUR PART

Stop Aquatic Hitchhikers like quagga mussels from spreading to other water by visiting our AIS removal stations and always remember to **Clean, Drain and Dry... Every Time and Everywhere.**

CLEAN

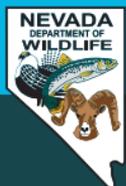

Remove all mud, plants and animals from every part of your boat.

DRAIN

Remove all water from your boat, including its live-wells before you leave the recreation area.

DRY

Allow boat to completely dry before you launch in another waterway.

GET YOUR AIS DECAL

IT'S THE LAW

Aquatic Invasive Species

The AIS decal requirement was established to prevent the spread of harmful aquatic species threatening Nevada's waterways. The decal supports AIS monitoring and analysis, provides AIS prevention through outreach and education, and provides seasonal watercraft inspections and decontamination stations. The decal requirement includes in and out-of-state motorized watercraft as well as most paddle-craft, such as canoes and kayaks. Watercraft that are capable of retaining water are required to display the decal. Paddle-craft such as stand-up paddle boards and float tubes are exempt from the decal requirement.

* AIS Decal is not required for AZ registered watercraft on Lakes Mead/ Mohave and the Colorado River; Not required for CA registered watercraft on Topaz Lake and Lake Tahoe.
