## **ACKNOWLEDGMENTS**

The Nevada Wildlife Action Plan revision is the result of the hard work of numerous partners whose contributions range from technical input to text review, to drafting some portion of the plan. This work was a team effort in every sense. However, special recognition goes to Larry Neel, retired Wildlife Diversity Division Staff Specialist for the Nevada Department of Wildlife, for his role in the delivery of this revised Wildlife Action Plan. Larry's vision, commitment and vast knowledge of the wildlife resources of Nevada are evident throughout the plan. During the development of the plan, Larry had a unique talent for integrating predicted habitats changes into wildlife species response and then developing conservation strategies for threats posed by climate change and other agents of change. The revised Wildlife Action Plan is an innovative, progressive blueprint for wildlife conservation in Nevada, thanks in large part to Larry's efforts.
