Grant Opportunity – Construction of a breakwater system at Topaz Lake, Douglas County, NV.

The Nevada Department of Wildlife (NDOW) has received Federal Grant funding for the construction of a breakwater system to shield the boat launch facilities at the Topaz Lake Recreation Area. Amount of money for distribution is $524,000.

Proposals are due no later than Wednesday, September 23, 2020. Grant proposals and any questions should be submitted to the Nevada Department of Wildlife Boating Access Program manager, Lance Murray at lmurray@ndow.org

Grant Application Instructions
Please find a Scope of Work below detailing the deliverables for the engineering and construction of a breakwater system at Topaz Lake Recreation Area boat launch. The proposal must include:
- Identification of the project manager and supporting staff (if applicable) along with a brief description of qualifications.
- Description of how the scope of work will be performed.
- An estimated budget for proposed activities.

Grant Eligibility (must meet all of the following criteria)
- Specific experience construction wave attenuation/breakwater systems.
- Specific experience operating heavy equipment from a floating barge.
- Specific experience working with submerged divers, and while working with submerged divers to place mooring anchors.
- Specific experience working on federally or state managed lands.
- Ability to contribute and document a minimum of $131,000 in non-federal match towards awarded federal grant funds.
- Subgrantee must have an active DUNS number, or ability to obtain one
- Subgrantee must be registered in the System for Award Management, at www.sam.gov, and be in good standing, OR, have the ability to obtain registration and good standing.

Scope of Work
NDOW is seeking a qualified vendor to supply engineering plans and specifications for a wave attenuation/breakwater system. The vendor or consultant shall also solicit bids for installation and hire a contractor to construct the breakwater system.

1. Objectives:
The major objective of this effort is the following:
Construct one breakwater system to effectively shield the boat ramp from wind driven waves. Construction should be completed in one phase prior to the lake’s busy recreational summer season. During construction, the boat ramp will remain accessible and a temporary floating boundary will be placed around the work zone. The consultant will also manage the project and ensure the breakwater system will be constructed as designed.
2. Location and Description:
The vendor will install the breakwater system to shield the boat ramp at the Topaz Lake Recreation Area, Douglas County, Nevada.

3. Contractor furnished property and services:
The contractor shall furnish all labor, equipment, and supplies necessary to perform all work as set forth in the specification.

4. Government furnished property and services:
No government furnished property is being provided by NDOW.

5. Selection Process:
The winning proposal will be selected through the NDOW scoring process, outlined in the NDOW Subgrant Manual at http://www.ndow.org/Our_Agency/Grants/.

6. Contract Monitor
Contract Monitor: Lance Murray
Nevada Department of Wildlife
6980 Sierra Center Parkway
Reno, NV 89521
Phone: 775-688-1409
E-mail: lmurray@ndow.org

7. Reporting
The successful subgrantee shall be required to provide NDOW Interim and Final Performance Reports and Interim and Final Financial Reports. Reporting deadlines and content shall be consistent with normal Federal Grant reporting requirements and will be detailed in the subgrant award.

8. Invoicing
A. All invoices shall be sent to the contract monitor listed above.
B. If the full complement objective is not met, and the vendor deems continued efforts are no longer feasible or worthwhile for the term of the contract then an invoice should be submitted for the work completed up to that point for which NDOW has not already been invoiced.
