

*Bat
Conservation*

&

Nevada

A.M.L.

Program

**Nevada has the most abandoned mine features of any state
in the U.S. (Approximately 250,000-300,000)**

**These abandoned mines have become important artificial roost sites
for a large number of Nevada's bat species for at least a portion of
their life. During the most critical periods :**

Hibernation & Maternity

23 Species of bats in Nevada

many of these use mines and caves for hibernation and Reproduction some are obligate mine roosting species

Temperature and Relative Humidity

Air-Flow

Funding spent on bat/bird compatible gates for FY2015 =
\$154,509
From Q-1 and Habitat Fee sources

31 bat/bird compatible closures were installed on
abandoned mines used for summer and winter roosts
during FY2015
