

2008 population estimate published in JWM

171 ± 20 adult males

90 ± 11 adult females

262

2011 population estimates from Program MARK/Sedinger

I ran a few models for the data set excluding management kills. Estimates of population size seem pretty stable among models:

Females 160 ± 13

Males 296 ± 26.

456
