

Help Nevada's Wildlife Habitat

The State of Nevada lost 1.46 million acres of wildlife habitat to wildfires this summer, including 1.04 million acres in Elko County alone. The 2006 fires, along with past fires, have reduced the habitat that had supported 30,000 deer in the 1960's down to possibly less than 6,000 deer.

An emergency fund has been set up by the Reno Chapter of Nevada Bighorns Unlimited (NBU) in cooperation with Nevada Department Of Wildlife to gather funding to support wildland rehabilitation efforts. This fund has been set up to allow individuals and interested organizations the opportunity to participate in the purchase of seed and its timely dispersal over scorched winter ranges.

Please contribute to restoring Nevada's wildlands. Donations may be made in person at any Heritage Bank of Nevada branch, or checks can be mailed in to:

Account Name: "NBU - Nevada Wildfire Disaster Fund"
