

**Changes in “R” Value Acres and Percent Area From Previous Habitat risk Narratives and the March 30, 2003 Edition.**

NOTE: Due to a math error the previous editions of the Narrative used the figure of 1,205,222 acres of potential sagebrush habitat. The correct figure should have been 1,487,929 acres. In order to present an accurate analysis of changes in “R” Value acres and percent of the area the following table will have the numbers which total to 1,205,222 acres, 1,487,929 acres and the new total figure of 1,475,506. **The change in acres and % of area is between the Corrected Pre 3/30/03 Edition and the 3/30/03 Edition.**

| R Values      | Pre 3/30/03 Edition |            | Corrected Pre 3/30/03 |            | 3/30/03 Edition  |                   | Change         |              |
|---------------|---------------------|------------|-----------------------|------------|------------------|-------------------|----------------|--------------|
|               | Acres               | % of Area  | Acres                 | % of Area  | Acres            | % of Area         | Acres          | % of Area    |
| <b>RO</b>     | 228,277             | 19         | 228,227               | 15.34      | 124,120          | 8.4               | -104,107       | -6.94        |
