

Massacre PMU with Habitat Values

 PMU Boundary

Habitat Values

-  R0
-  R1
-  R2
-  R3
-  R4

- R0 - Key sage grouse habitat
- R1 - Areas with potential to produce sagebrush plant communities that have good understory composition of desired grasses and forbs, but lack sufficient sagebrush canopy.
- R2 - Existing sagebrush plant communities with insufficient desired grasses and forbs in the understory.
- R3 - Areas with potential to produce sagebrush plant communities, that have not crossed the juniper woodland threshold, but are in various stages of becoming encroached upon by juniper.
- R4 - Areas with potential to produce sagebrush plant communities, but are dominated by annual grasslands, annual forbs, or bare ground.
