**Legislative Counsel's Digest:**

Existing law requires the Board of Wildlife Commissioners to adopt regulations necessary for the preservation, protection, management and restoration of wildlife and its habitat

LCB Version  
with one NDO  
Change to pg 23  
Dec 2021

and to establish regulations necessary to carry out the provisions governing wildlife. (NRS 501.105, 501.181)

Existing regulations require an application for the initial issuance of a license, tag, permit or other licensing document to contain certain information, including the applicant's social security number or, if the applicant is a citizen of a country other than the United States, the passport number issued to the applicant by that country. (NAC 502.199) **Section 2** of this regulation requires that, if the applicant is a citizen of a country other than the United States, the application must include the valid passport number issued to the applicant by that country.

If any person who possesses a tag to hunt a big game mammal kills an animal that is believed to be diseased and unfit for human consumption, existing law requires the person to place his or her tag on the carcass in the manner provided by law and regulation and to provide the whole carcass for inspection by an authorized representative of the Department of Wildlife or by a veterinarian. If the carcass is diseased and unfit for human consumption, the holder of the tag is entitled to receive at no charge another tag as a replacement. (NRS 502.215, as amended by section 5 of Senate Bill No. 406, chapter 304, Statutes of Nevada 2021, at page 1758) Existing regulations require the Department to issue such a replacement tag if a biologist or game warden of the Department or a veterinarian avers on the affidavit of diseased big game that the animal is diseased. (NAC 502.321) **Section 3** of this regulation requires the issuance of such a replacement tag if the biologist or game warden or veterinarian avers on the affidavit of diseased big game that the animal is diseased and unfit for human consumption.

Existing law requires, in addition to the regular hunting licenses that are issued, additional licenses that are known as tags to be issued for a person to hunt bighorn sheep. (NRS 502.130) Existing law authorizes the Commission to adopt any regulations necessary relative to the manner of attaching such tags. (NRS 502.160) Existing regulations require a person who kills a ram to, within 5 days after killing it, personally present the skull and horns of the animal to a representative of the Department for: (1) inspection; and (2) attachment of a seal to one of the horns. (NAC 502.345) **Section 4** of this regulation requires a person to personally present the skull and horns of the bighorn sheep to a representative of the Department within 5 business days after killing it.

Existing regulations require any person who kills a bobcat to, within 10 days after the close of the season: (1) present the pelt for inspection and give the lower jaw to a representative of the Department; (2) have the Department's seal affixed to the pelt; and (3) complete a report of the killing. Existing regulations provide that it is unlawful for a person to present for sealing or to have sealed in this State the pelt of any bobcat taken in another state. (NAC 502.347) **Section 5** of this regulation additionally provides that it is unlawful for a person to present for sealing or to have sealed in this State the pelt of any bobcat taken or possessed unlawfully by any person.

Existing law requires, in addition to the regular hunting licenses that are issued, additional licenses that are known as tags to hunt mountain lions. (NRS 502.130) Existing regulations provide that any resident of Nevada or nonresident is eligible to obtain not more than two mountain lion tags in any year. Existing regulations provide how such tags may be purchased and used and when such tags expire. (NAC 502.370) Except in certain situations where a tag may be transferred, **section 6** of this regulation additionally requires the tag to be purchased by: (1) the holder of the mountain lion tag; or (2) if a child under the age of 18 is applying for the mountain lion tag, the child or the parent or guardian of the child.

Existing law authorizes the Commission to limit the number of tags to be used in a management area. (NRS 502.130) Existing law requires the Department to designate the electronic and paper forms of the tag and requires each tag to show the game for which it may be used, the year and, whenever necessary, the management area in which it may be used. (NRS 502.160, as amended by section 4 of Senate Bill No. 406, chapter 304, Statutes of Nevada 2021, at page 1757) Existing regulations authorize the use of mountain lion tags in any management unit or group of management units in Nevada during the open season for mountain lions. (NAC 502.370) **Section 6** provides that the mountain lion tag may be used in any management unit or group of management units in Nevada that are open for the hunting of mountain lions.

Existing regulations require a person who harvests a mountain lion to, within 72 hours after harvesting it, personally present the skull and hide to a representative of the Department for inspection. (NAC 502.370) **Section 6** requires a person who harvests a mountain lion to, within 5 business days after harvesting it, personally present the unfrozen skull with the jaws propped open and the unfrozen pelt in its entirety to a representative of the Department for inspection. **Sections 1 and 8** of this regulation make a conforming change by referencing the pelt of a mountain lion instead of the hide of a mountain lion. **Section 6** additionally requires a person who harvests a mountain lion to, within 5 business days after harvesting it, provide certain records to the Department, as specified by the Department.

Existing law prohibits a person from willfully possessing any mountain lion that was unlawfully killed if: (1) the person knows the animal was killed unlawfully; or (2) the circumstances should have caused a reasonable person to know that the animal was killed unlawfully. (NRS 501.376) Existing regulations provide additional actions that are unlawful for any person to perform in regards to mountain lions. (NAC 502.370) **Section 6** provides that it is unlawful for any person to possess, capture, injure, drug, rope, trap, snare or otherwise harm or transport a live mountain lion unless authorized by statute or regulation. **Section 6** additionally provides that it is unlawful to: (1) provide a false statement in reporting the harvesting of a mountain lion; (2) participate in a canned hunt; and (3) release a mountain lion for the purpose of a canned hunt after previously capturing and confining the mountain lion for a period of time.

Existing law provides that, unless otherwise specified by the Commission in regulation, it is unlawful to hunt big game mammals in any manner other than with a rifle or with a longbow and arrow. (NRS 503.150) Existing regulations define “big game mammal” to include mountain lions. (NAC 502.020) Existing regulations authorize a person to hunt big game mammals with a firearm, crossbow or bow and arrow. (NAC 503.142, 503.143, 503.144) Existing regulations require that if a mountain lion is accidentally trapped or killed, the person trapping or killing the mountain lion must report the trapping or killing within 48 hours to a representative of the Department. (NAC 503.370) **Section 6** clarifies that a mountain lion may not be taken with a trap, snare or other trapping device unless authorized by the Department. **Section 6** sets forth the manner in which a mountain lion must be released if it is trapped and is alive and requires that a mountain lion be disposed of in accordance with the instructions of the representative of the Department if it is killed.

**Section 6** provides that the provisions of **section 6** do not apply to a person who: (1) is acting within the scope of his or her official duties and who is an employee of certain governmental entities; or (2) holds a scientific permit for the collection or possession of a mountain lion and is complying with the terms and conditions of the scientific permit.

Existing law authorizes the Commission to adopt any regulations necessary relating to the manner of attaching tags. (NRS 502.160) Existing regulations require the owner of a tag or

permit to firmly attach the tag to the carcass of an animal killed by the owner, at or before the time he or she first reaches his or her means of transportation or camp. (NAC 502.400) **Section 7** of this regulation clarifies that the tag or permit must be firmly attached to the carcass at or before the time he or she reaches his or her means of transportation or camp, whichever he or she reaches first.

Existing regulations require the Department to reject an application to obtain a tag, permit or bonus point if the applicant fails to specify or incorrectly specifies the number of his or her hunting license or his or her combination hunting and fishing license, unless the number exists in the records of the Department. (NAC 502.418) **Section 9** of this regulation removes this requirement for the rejection of such an application.

Existing law requires a person who wishes to apply for a restricted nonresident deer tag to complete an application, pay certain fees and meet certain other requirements. Existing law authorizes a licensed master guide to complete the application for an applicant. (NRS 502.148) Existing regulations require the Department to reject an application for a restricted nonresident deer tag or to prohibit a person from submitting the application in certain situations, including if the applicant and the master guide named in the application are the same person. (NAC 502.4235) **Section 10** of this regulation requires the Department to reject an application for a restricted nonresident deer tag or to prohibit a person from submitting the application if the applicant and the licensed master guide or the applicant and a subguide associated with the deer hunt are immediate family members.

Existing regulations authorize the holder of a restricted nonresident deer tag to apply to the Department for a refund or to retain a new master guide if the original master guide of the holder of the tag: (1) dies; (2) is no longer able to provide guide services due to medical reasons; (3) is no longer able to provide guide services because he or she has failed to renew his or her master guide license; or (4) is no longer able to provide guide services due to his or her master guide license being revoked. (NAC 502.4238) **Section 11** of this regulation additionally allows for such an application for a refund or retention of a new master guide if the original master guide of the holder of the tag is no longer able to provide guide services due to: (1) his or her master guide license being revoked, suspended or denied; or (2) the master guide not possessing a valid special use permit required by the federal land management agency having jurisdiction within the wildlife management area or unit in which the master guide seeks to provide guide services.

Existing law authorizes an owner, lessee or manager of private land in this State to apply to the Department for the issuance to him or her of one or more deer or antelope tags as compensation for damage caused by deer or antelope to the private land of the person or to any improvements on the private land. Existing law requires the Department to review the application and authorizes the Department to conduct any investigation it deems appropriate. (NRS 502.145) Existing regulations require a separate application to be made, and a separate cooperative agreement to be entered into, for each request for deer or antelope compensation tags with regard to each separate location on the property. (NAC 502.4246) **Section 12** of this regulation provides that if the Department is able to conduct an investigation at each separate location on the same day or consecutive days, an applicant is authorized to submit a request for damage compensation tags for multiple locations on the same application and one cooperative agreement may be entered into for the multiple locations.

Existing law requires a license to practice taxidermy before any person may perform taxidermy services. Existing law requires the Department to issue annual taxidermy licenses to

applicants who: (1) satisfy the requirements established by the Department; and (2) pay a fee. (NRS 502.370) Existing regulations provide that an annual taxidermist license expires on June 30 of each year and requires an application for the renewal of a taxidermist license to be received by the Department on or before June 30. (NAC 502.440) Existing regulations require a licensed taxidermist to maintain certain records for each licensing year, which ends on June 30, and further requires a licensed taxidermist to submit a copy of the taxidermist's records for the previous licensing year to the Department at the end of each licensing year if the Department requires such records to be submitted. (NAC 502.455) **Section 14** of this regulation requires a licensed taxidermist to submit such records on the earlier of the date that the taxidermist submits his or her application for the renewal of his or her taxidermist license or June 30. **Section 13** of this regulation makes a conforming change.

**Section 1.** NAC 501.200 is hereby amended to read as follows:
