MEMORANDUM

April 20, 2021

To: Nevada Board of Wildlife Commissioners, County Advisory Boards to Manage Wildlife, and Interested Publics

From: Mike Scott, Administrator, Game Division

Title: **Commission Regulation 21-04 Amendment #1, 2021 Black Bear Quotas – For Possible Action**

Description: The Commission will establish regulations for the numbers of tags to be issued for the 2021 black bear season

Presenter: Wildlife Staff Specialist Pat Jackson

Summary:

The Department is recommending a resident quota of 45 tags and a non-resident quota of 5 tags for the 2021 Black Bear season. These recommendations have remained unchanged since 2017. The Department recommends a total harvest limit of 20 bears with the same harvest limits as 2020: combined limit of 6 bears from Units 192, 194, 195, & 196 with a female limit of 3; combined total of 6 bears from Units 201, 202, 204, and 206 with a female limit of 2; and a combined limit of 8 bears from Units 291 and 203 with a female limit of 3. If either the female limit or total limit is reached in a unit group, that unit group will be closed to further bear hunting.

The Department estimates the statewide bear population at 600-700 animals (18 months of age or older). The population in Units 192, 194, 195, 196, and 291 combined was calculated using population estimation procedures in Program MARK. The population in these areas has stabilized and is estimated at 400 – 450 animals. These areas represent roughly half of the occupied bear habitat in Nevada. The Department has also initiated a Passive Survey Estimate of Black Bears in Nevada to add to the knowledge base to estimate the Nevada bear population. The Nevada population is contiguous and integral with the bear population in California, which now estimates their hunted black bear population at 40,000.

Recommendation:

The Department recommends that the Commission **VOTE TO ADOPT COMMISSION REGULATION 21-04 Amendment #1, 2021 BLACK BEAR QUOTAS AS PRESENTED**
