

**Species:** Mule Deer

**Unit Group:** 141-145

**Hunt Geometry ID:** 61

**Hunt ID:** [306, 887, 360, 428, 241, 240, 160, 161, 215]

**Access:** Access is good to most hunting areas with many county and BLM roads. There are a few parcels of private land on the west side of the Diamond Range, Unit 144, that block access to public land. Some areas are limited to four-wheel drive vehicles, but the majority of roads are passable with a pick-up.

**Recommended Hunting Areas:** The majority of the deer in this unit group are concentrated in the Diamond Range, Unit 144. Hunters should concentrate at mid to upper elevations early in the season. The Diamond Peak area and the north end of the Diamond Range has steep rugged terrain with few roads offering hunters some rugged country to hike or use horses. Roberts Mountain, Unit 143, has a smaller population but good hunting early in the season. The Fish Creek Range has a small resident deer population as well, with hunting improving late in October as deer migrate into this unit.

**Biologist Comments:** The town of Eureka offers most supplies and services. Carlin and Elko to the north offer all services. There are no public campgrounds in the unit group but several private RV Parks are located in Eureka. Primitive camping is allowed on the public lands.
