MEMORANDUM

February 23, 2022

To: Nevada Board of Wildlife Commissioners, County Advisory Boards to Manage Wildlife, and Interested Publics

From: Russell Woolstenhulme, Staff Specialist, Game Division

Title: **Commission Regulation 22-10, Migratory Game Bird Seasons, Bag Limits, and Special Regulations for Waterfowl and Webless Migratory Game Birds; Public hunting limited on Wildlife Management Areas and Designated State Lands – 2022–2023 Season – For Possible Action**

Description: The Commission will consider recommendations for seasons, bag limits, and special regulations for migratory game birds for the 2022–2023 season and adopt regulations consistent with the proposed regulations framework for the 2022–2023 hunting seasons on certain migratory game birds established by the U.S. Fish and Wildlife Service. The Commission Regulation will become final pending adoption of federal frameworks. The Commission will also consider rules regulating public hunting on Wildlife Management Areas and designated state lands.

Presenter: Wildlife Staff Specialist Russell Woolstenhulme

Summary:

Season regulations for hunting migratory waterfowl, doves, and crows differ from some other common species, like mule deer, that are not governed by the Migratory Bird Treaty Act. The U.S. Fish and Wildlife Service works with the states within designated flyways, and Nevada resides within the Pacific Flyway. Collectively, the Pacific Flyway develops regulatory sideboards known as the Federal Frameworks within which each state may promulgate seasons for hunting. Although the Federal Frameworks are generally established by the time the Commission acts on the Migratory Game Bird Commission Regulation, the federal government suffered delays this year and the proposed frameworks are still draft. Should the final approved frameworks require amendment to this CR, the Department will bring this CR back to the Commission before seasons are published.

The Department is recommending some changes to waterfowl and migratory bird seasons from those adopted by the Commission last year in March. The Department recommends the

Commission reinstate the draw system for the Nevada Swan hunt. A draw would allow individuals to apply for a single tag during the draw period. Any remaining permits would be available after the main draw on a first come first serve basis. Second permits would be available for purchase during this period. The Department is also recommending an increase in the daily bag limits for Canada Geese and Brants from 4 to 5 daily. The Department also recommends a change to daily bag limits for hen Mallard include the Mexican Duck as limited take in the aggregate.

Continental and Flyway Conditions

Due to the COVID-19 (SARS-CoV-2) pandemic, most migratory breeding surveys (e.g., the Breeding Waterfowl Population and Habitat Survey, Breeding Bird Survey, and others) conducted by the U.S. Fish and Wildlife Service, Canadian Wildlife Service, US Geological Survey, as well as state and provincial agencies were canceled in spring 2021. We therefore present no status information on any duck species as all the estimates or indices for ducks rely on these surveys. Western Canada Geese numbers continue to increase and are currently over population objectives as are Pacific Greater White-fronted Geese and Western Canadian Arctic Snow Geese.

The predicted abundance of mourning doves for September 2021 in the Western Management Unit were 33.7 million, which results in a standard regulatory alternative as prescribed by the harvest strategy.

Nevada

Similar to Federal and international efforts, Nevada suspended all surveys during 2020 due to the COVID-19 outbreak. No data are available.

Habitat

In Nevada, 2020-2021 winter precipitation and run-off was below normal, following below normal precipitation the previous year. Most wetlands in northern Nevada including the Carson Sink area (Stillwater National Wildlife Refuge, Carson Lake Wildlife Management Area) entered the breeding season with residual waters.

As of February, 2022, year-to-date precipitation (Oct 1 – Feb 22) is slightly above average for Nevada. Lake Tahoe Basin precipitation was reported at 114% of normal, Walker River and Carson River Basins (including Lahontan Basin) were reported at 109% and 115% of normal respectively, and Eastern Nevada (Ruby Marshes) was reported at 93% of normal. Many Nevada marshes have water. Reservoir storage at Lahontan Reservoir is at 27% of capacity, while Rye patch is currently at 44 percent.

Recommendation:

The Department recommends that the Commission **VOTE TO APPROVE CR 22-10 MIGRATORY GAME BIRD SEASONS, BAG LIMITS, AND SPECIAL REGULATIONS FOR WATERFOWL AND WEBLESS MIGRATORY GAME BIRDS; PUBLIC HUNTING LIMITED ON WILDLIFE MANAGEMENT AREAS AND DESIGNATED STATE LANDS – 2022–2023 SEASON AS PRESENTED.**
