Grant Opportunity – Assessing Golden Eagle Habitat Use, Demographics, and Breeding Indices

The Nevada Department of Wildlife (NDOW) has received Federal Grant funding for the development of statistical and mathematical models to assess existing golden eagle movement and demographic data. The total amount of funding available for this project in State Fiscal Year 2024 is $12,000.

Proposals are due no later than Friday September 15, 2023. Grant proposals and any questions should be submitted to the Nevada Department of Wildlife Staff Specialist, Jonathan Young at Jonathan.young@ndow.org

Grant Application Instructions
Please find a Scope of Work below detailing the deliverables for the development of statistical and mathematical models to assess existing golden eagle movement and demographic data. The proposal must include:

- Identification of the project manager and supporting staff (if applicable)
- Description of how the scope of work will be performed;
- An estimated budget for proposed activities

Grant Eligibility (must meet all of the following criteria)

- Specific experience developing statistical models
- Specific experience assessing movement and demographic data
- Specific experience interpreting and reporting results through formal and informal means
- Subgrantee must have an active UEI number, or ability to obtain one
- Subgrantee must be registered in the System for Award Management, at www.sam.gov, and be in good standing, OR, have the ability to obtain registration and good standing.

Scope of Work
NDOW is seeking a qualified vendor to develop custom statistical models to assess existing movement and demographic golden eagle data. Interpretation of results shall be written up in report form to include a minimum of one manuscript.

1. Objectives:
The major objective of this effort is the following:
To address important information gaps on golden eagle movement, resource selection, and population dynamics, in relation to renewable energy development and other activities on the landscape. The development of advanced statistical and mathematical models will be the basis for inference on these information gaps. Models shall be fit with existing data that have been collected by NDOW.
2. Location and Description:
   Work will be computer based.

3. Contractor furnished property and services:
   The contractor shall furnish all labor, equipment, and supplies necessary to perform all
   work as set forth in the specification.

4. Government furnished property and services:
   No government furnished property is being provided by NDOW.

5. Selection Process:
   The winning proposal will be selected through the NDOW scoring process, outlined in the
   GRANTS-MANUAL-4.17.17.pdf.

6. Contract Monitor
   A. Contract Monitor: Jonathan Young
      Nevada Department of Wildlife
      6980 Sierra Center Parkway
      Reno, NV 89521
      Phone: 775-688-1404
      E-mail: Jonathan.young@ndow.org

7. Reporting
   The successful subgrantee shall be required to provide NDOW Interim and Final
   Performance Reports and Interim and Final Financial Reports. Reporting deadlines and
   content shall be consistent with normal Federal Grant reporting requirements and will be
detailed in the subgrant award.

8. Invoicing
   A. All invoices shall be sent to the contract monitor listed above.
   B. If the full complement objective is not met, and the vendor deems continued efforts
      are no longer feasible or worthwhile for the term of the contract then an invoice
      should be submitted for the work completed up to that point for which NDOW has not
      already been invoiced.
